Technical Operator building AI-powered products and systems. I enjoy turning ambiguous business problems into structured execution across product, operations, and engineering.

EDUCATION

SRM Institute of Science and Technology

Chennai, India

B.Tech. Computer Science & Engineering (Data Science Specialisation) | CGPA: 9.57/10

June 2023 – May 2027

Waseda University – Semester Exchange

Tokyo, Japan

School of Fundamental Science and Engineering

Sep. 2025 – Mar. 2026

EXPERIENCE

AI Product & Engineering Intern

Feb. 2026 – Present

Git Software Technologies (Remote)

Swindon, England, UK

- Owned the discovery, scoping, and deployment of an enterprise AI workflow to automate customer support inquiries, integrating directly with existing CRM databases to reduce query-to-insight latency by 65%.
- Led cross-functional discovery with 12+ stakeholders to centralize fragmented legacy data into a unified retrieval layer, unblocking engineering dependencies and accelerating product deployment timelines.
- Defined evaluation benchmarks for production AI systems to manage non-deterministic outputs, ensuring high-reliability task completion and preserving user trust in enterprise deployments.

Technical Trainee Intern – Strategy & Operations

June 2025 – Aug. 2025

KPMG India

Gurugram, Haryana

- Spearheaded an enterprise automation initiative for the Aerospace & Defence sector, translating ambiguous regulatory procurement requirements into a structured, NLP-driven intelligence pipeline.
- Defined core product success metrics (latency, accuracy, stakeholder adoption) and utilized them to drive data-backed go/no-go deployment decisions with senior organizational leadership.
- Drove operational adoption of the automated workflow across 20+ stakeholders, enabling the rapid ingestion and validation of 500,000+ records while cutting systemic process turnaround by 20%.

Research and Development Intern – HPC Systems

Mar. 2025 – June 2026

Samsung Research Institute-Bangalore (Remote)

Bengaluru, Karnataka

- Optimized production-scale LLM inference pipelines on HPC infrastructure (NVIDIA A100), reducing memory constraints by 40% and accelerating inference speed by 1.5× to lower underlying operational compute costs.
- Built comprehensive benchmarking workflows to evaluate cost, latency, and quality trade-offs across multiple deployment configurations, enabling leadership to make data-driven infrastructure decisions.

PROJECTS

Product Strategy Case Studies Portfolio | *Notion Portfolio*

June 2026

- Authored 10+ investment-style product memos evaluating consumer, fintech, and AI products; analyzed growth loops, monetization strategies, retention drivers, and execution trade-offs.

OdinSub – Live Translation Engine | *Live Demo*

May 2026

- Identified live multilingual communication as a high-friction vulnerability for cross-border creators; launched a commercial real-time translation application backed by tiered enterprise pricing models.
- Prioritized retention over acquisition after identifying early churn as the primary source of revenue leakage; built an automated intervention engine to cut projected leakage by 15%.

VeriLoad – Dispatch Reconciliation & Validation Platform | *Live Demo*

Apr. 2025 – May 2025

- Shipped a 0-to-1 operational platform solo: scoped business requirements, built a statistical reconciliation engine (91% accuracy across 120+ edge cases), and launched a stakeholder-facing operational dashboard.

CORE COMPETENCIES

Strategy & Operations: Business Strategy, Go-To-Market (GTM), Requirements Scoping, Process Optimization, Stakeholder Mgmt.

Product & Analytics: Product Analytics, Metric Definition, Experimentation, Customer Journey Mapping, SQL, Tableau

AI & Systems: Enterprise Automation, AI Systems Architecture, LLM/RAG Workflows, Python, AWS, Cost/Latency Optimization

LEADERSHIP, CERTIFICATIONS & ACHIEVEMENTS

Leadership & Programs: McKinsey Forward Program, Aspire Leaders Program (Harvard-led), Blue Marble Tour (Deakin Univ.)

Certifications: AWS Certified Developer – Associate, Oracle AI Vector Search, Machine Learning – I (Columbia Univ.)

Achievements: Algoverse AI – Top 1% Scholar, Best Working Model – IoT
