

Krrish Khanna

Chennai, India | +91 97739 34134 | krrishkhanna08@gmail.com | [linkedin.com/in/krrishkhanna](https://www.linkedin.com/in/krrishkhanna) | github.com/krrishkhanna

Product-minded engineer with experience building AI-powered products and translating ambiguous business problems into scalable solutions. Passionate about product strategy, experimentation, and shipping user-centric experiences.

EDUCATION

SRM Institute of Science and Technology

Chennai, India

B.Tech. Computer Science & Engineering – Data Science Specialisation | CGPA: 9.57/10

June 2023 – May 2027

Waseda University – Semester Exchange

Tokyo, Japan

School of Fundamental Science and Engineering

Sep 2025 – Mar 2026

EXPERIENCE

AI Product & Engineering Intern

Feb 2026 – Present

Git Software Technologies (Remote)

Swindon, England, UK

- Scoped and shipped AI-powered knowledge retrieval workflows, reducing user query-to-insight time by 65% by iterating directly on customer feedback and qualitative user observation.
- Proposed feature improvements using synthesized user feedback and defined success metrics, driving cross-functional alignment to unblock engineering dependencies.
- Defined product performance benchmarks, presenting user-impact data and feature prioritization recommendations directly to international stakeholders.

Technical Trainee Intern – Govt. & Public Services

June 2025 – Aug 2025

KPMG India

Gurugram, Haryana

- Led product discovery through 10+ user interviews to translate ambiguous regulatory procurement requirements into a structured workflow automation product.
- Defined success metrics (task latency, adoption, accuracy) and utilized them to drive go/no-go deployment decisions with senior organizational leadership.
- Drove operational adoption across 20+ end-users, reducing manual audit effort by 20% by delivering a user-centric data validation framework.

Research and Development Intern – HPC Systems

Mar 2025 – June 2026

Samsung Research Institute-Bangalore (Remote)

Bengaluru, Karnataka

- Evaluated engineering trade-offs between model quality, latency, and infrastructure cost, directly influencing roadmap decisions to lower compute overhead by 40%.
- Validated AI pipeline outputs against real-world usage patterns, translating experimental findings into actionable product recommendations that guided system optimization priorities.

PROJECTS

Product Strategy Case Studies Portfolio | Notion Portfolio

June 2026

- Authored 10+ product strategy memos analyzing user journeys, activation, retention, and monetization across leading consumer and fintech products.
- Developed feature prioritization frameworks evaluating user value, friction points, and KPI velocity to propose data-driven product improvements.

OdinSub – Live Translation Engine | Live Demo

May 2026

- Identified live multilingual communication as a high-friction user problem; launched a commercial real-time translation application backed by tiered enterprise pricing and GTM strategy.
- Prioritized retention over acquisition by identifying churn patterns in user behavior; built an automated intervention engine to reduce projected revenue leakage by 15%.

VeriLoad – Dispatch Reconciliation & Validation Platform | Live Demo

Apr 2025 – May 2025

- Shipped a 0-to-1 operational product: conducted user research, scoped business requirements, and built a reconciliation engine to reduce operational uncertainty.
- Designed UX patterns centered on user trust, surfacing real-time confidence scores via a dashboard to maintain transparency in non-deterministic AI edge cases.

Vachan – Multilingual Fact-Checking Platform | Live Demo

Feb 2025 – Mar 2025

- Designed an end-to-end platform addressing misinformation friction; built a stakeholder-facing dashboard for accuracy reporting, iterating via continuous user feedback loops.

PRODUCT & TECHNICAL TOOLKIT

Product: Discovery, Roadmap, Metrics, User Interviews, A/B Testing, Experimentation, UX Trade-offs, Stakeholder Mgmt.

Analytics: SQL, Tableau, Excel, Product Analytics, Customer Journey Mapping, Funnel Optimization

Technical: Python, REST APIs, FastAPI, AWS, PostgreSQL, LLMs, RAG, Prompt Engineering

CERTIFICATIONS & ACHIEVEMENTS

Certifications: AWS Certified Developer – Associate, Oracle AI Vector Search, Machine Learning – I (Columbia)2025–26

Leadership: McKinsey Forward Program, Aspire Leaders Program (Harvard-led), Blue Marble Tour (Deakin Univ.)2024–25

Achievements: Algoverse AI – Top 1% Scholar, Best Working Model – Smart Irrigation IoT 2023–25
